PROFILE SUMMARY

Aspiring Data Analyst with hands-on experience in **SQL, Power BI, and Python**, specializing in **e-commerce and HR analytics**. Analyzed **\$847K revenue** using **advanced SQL (JOINS, CTEs, Window Functions)** and built **interactive Power BI dashboards** analyzing **850+ employees** with **40+ DAX measures**. Skilled in **customer segmentation, retention analysis, data visualization, and business intelligence**, with the ability to translate **complex data into actionable insights**.

EDUCATION

Bachelor of Technology (B Tech) - Information Technology, 11/2020 – 11/2024
Kalasalingam Academy of Research and Education, Krishnankoil, Tamil Nadu, India
CGPA: 7.2

TECHNICAL SKILLS

- Data Analysis & BI:**
 - SQL (data extraction, joins, aggregations)
 - Power BI (DAX basics, dashboards, reporting)
 - Excel (analysis, validation, reporting)
 - Python (Pandas for data analysis)
- Data Visualization & BI:**
 - Power BI**Databases & Querying:**
 - Oracle SQL
 - PostgreSQL
 - MySQL**Programming & Analysis:**
 - Jupyter Notebook (Python)**Workflow & Automation:**
 - Power Automate**Project Management & Methodology:**
 - JIRA
 - Agile / Scrum

PROJECTS

- Project-1** 03/2025 – 04/2025
HR ANALYTICS DASHBOARD
Domain: HR Analytics & People Analytics
Role: Data Analyst.
Tools: Python | Power BI | DAX
 - Built comprehensive **HR dashboard** analyzing **850+ employees, 2,500 performance reviews, and 5,000+ salary changes** using **Power BI**
 - Created **40+ DAX measures** to track **attrition rates, diversity metrics, recruitment effectiveness, and performance trends**
 - Identified **18% attrition rate** in **Sales department** (highest across organization), enabling **targeted retention strategies**
 - Discovered **35% regrettable loss rate** among **high performers**, informing **talent retention and succession planning initiatives**
 - Analyzed **recruitment funnel** revealing **employee referrals** achieved **22% hire rate (3x higher** than other sources)
 - Performed **pay equity analysis** showing **<3% gender pay gap** across **all levels**, ensuring **fair compensation practices**
 - Designed **interactive dashboards** with **drill-down capabilities** by **department, tenure, performance rating, and demographics**
 - Tracked **diversity metrics** across **gender, age groups, and departments** to support **DEI (Diversity, Equity, Inclusion) initiatives**
 - Generated **actionable insights** for **HR leadership** on **workforce planning, retention strategies, and recruitment optimization**
- Project -2** 05/2025 – 07/2025
E-Commerce Business Analysis
Domain: Retail Sales Analytics.
Role: Data Analyst.
Tools: PostgreSQL | Jupyter Notebook(Python) | Excel
 - Built complete **database** with **5 tables** and **8,400+ records** using **SQL** and **Python** to simulate **real business data**
 - Analyzed **\$847K revenue** using **20+ SQL queries** to identify **top customers, products, and sales trends**
 - Found **VIP customers (10% of base)** generating **35% of total revenue**, enabling **targeted marketing**
 - Calculated **42% retention rate** and identified **8% at-risk customers** for **churn prevention strategies**
 - Optimized **pricing strategy** – discovered **11–20% discounts** increased **sales by 23%**
 - Identified **top category (Electronics)** driving **38% of revenue** and **peak sales month (December)**
 - Analyzed **customer behavior** across **500 customers** showing **top 10 customers** contributing **15% (\$127K) of total revenue**
 - Performed **product performance analysis** identifying **average ratings by category** and **12 dead-stock products** for **inventory clearance**
 - Created **visual dashboards in Excel** showing **revenue trends, customer segments, and sales performance** for **stakeholders**.
